SUMMARY

Analytical Software Engineer with hands-on experience in backend and full-stack web development using Python, Flask, FastAPI, SQL, and Docker. Developed and deployed production-ready systems, including a Worker Identification System (WIS) that increased workflow efficiency by 60%. Skilled in REST API design, database optimization, and containerized deployment, with a strong foundation in object-oriented programming, web security, and UI/UX design principles. Focused on building scalable, maintainable, and user-centred applications that improve operational performance.

TECHNICAL SKILLS

- Languages: Python, PHP, C++, C#, SQL, JavaScript, TypeScript, HTML 5, CSS.
- Frameworks: Flask, FastAPI, Bootstrap, TailwindCSS, REST API, React.js, Vite, ASP.NET Core Web API.
- Authentication & Security: Keycloak for role-based access control (RBAC) and single sign-on (SSO).
- Databases: MySQL, PostgreSQL.
- Tools & DevOps: Docker, Git, GitLab CI/CD, Keycloak.

PROFESSIONAL EXPERIENCE

REDtone Sdn Bhd, Software Engineer Intern

Aug 2024 - Jan 2025

- Developed and deployed Worker Identification System (WIS) using Flask and MySQL, automating staff credential management and boosting data retrieval efficiency by 60%.
- Engineered and optimized RESTful APIs with Flask/FastAPI, integrating the HR team's API and eliminating 4 hours of manual data entry weekly.
- Contributed to NG999, a collaboration system built with the government, supporting API development and database queries to enhance backend performance.
- Designed responsive UI components and 30+ reusable frontend modules using HTML, CSS, and JavaScript (Bootstrap), reducing input errors by 25%.
- Conducted WIS user training and handled bug fixing and maintenance across several internal websites to ensure system stability.

Freelance Web Developer (Remote)

May 2026 - Present

Project: PT Green Karindo Elite - Property Company Landing Page

- Designed and developed a responsive landing page for a property developer using React.js, TypeScript, and Vite, working directly with the client to translate business needs into a clean web presence.
- Built project cards with Google Maps location integration, a hero section, company profile and vision & mission sections, plus automated form submission to the marketing team and a fixed WhatsApp consultation button.

PROJECTS

BMDS-ZKP: Secure Electronic Health Records (EHR) in Web Application Feb 2025 - Jul 2025

- Designed and deployed a secure EHR system integrating CP-ABSE, Schnorr ZKP, and Ethereum-based audit logging, built with Flask, Docker, MySQL, Web3.py, IPFS, and AES to ensure data confidentiality, tamper-proof access trails, and reliable record retrieval.

EDUCATION

Bachelor of Computer Science and Technology (Hons)

Sep 2021 - Sep 2025

Xiamen University Malaysia | CGPA 3.30/4.00

ADDITIONAL INFORMATION

- Languages: English, Bahasa Indonesia, Bahasa Melayu, Mandarin, Hokkien.
